

Requirements for team project idea presentation

Requirements for team project idea presentation:

- **Project name, team members** (1 slide).
- **Topic Overview** (1 - 2 slides): Introduce the topic, explain your motivation for choosing it, and survey existing real-world systems that address the same problem.
- **Software Functionality** (2 - 3 slides): Specify the core features and functionality of your software management system.
- **UML diagram** (1 - 2 slides): Planned classes, their attributes, methods, and relationships.
- **Function analysis** (2 - 5 slides): Provide a step-by-step breakdown for each function. For example, the **Add Employee function**:
 - Step 1: Users choose option 1 for adding an employee.
 - Step 2: System asks users to fill in employee details (name, ID, role, department)
 - Step 3: System checks for duplicate IDs and required fields.
 - Step 4: A new Employee object is created and linked to the relevant Department.
 - Step 5: System confirms success or returns an error message.
- Task assignment for team members (1 slide).
