Topics for the final exam

Dear all,

Following are the topics for the Final exam:

-Proof by induction, contradiction, by cases, ….

- Counting: permutation and combination, binomial theorem
- Advanced counting techniques
- Pigeonhole principle
- Discrete probability
- Recursively defined sequences.
- Solving first and second order linear recurrence relations.
- Graphs: -Vertices, edges, degree
- Adjacency and incident matrices of graphs
- Check if 2 graphs are isomorphic
- Connectedness
- Path and circuit in graphs
- Euler and Hamilton path (circuit) in a graph.
